

## About Us

---

Founded in October 2016 on the entrepreneurial spirit of Mauro Brunato and Paolo Lorenzo Brignoli—having been Chief Inspectors with the State Police at the Police Headquarters of Milan since 1982—BBS Security is an Investigations and Security Agency certified pursuant to UNI 10891:2000 (Supervisory Institutes - Ministerial Decree 269/2010) and in possession of licences:

- No. 14717/12B15B Area OSP I TER issued on 20<sup>th</sup> July 2017, from the Prefecture of Milan to Chief Inspector Mauro Brunato, for carrying out control services for entertainment and performance activities (Ministerial Decree 6<sup>th</sup> October 2009) and stewarding at sporting events (Ministerial Decree 8<sup>th</sup> August 2007);
- No. 14742/12B15E Area OSP I TER, issued on 30<sup>th</sup> April 2018 by the Prefecture of Milan to the First Director of the State Police Carlo Iacovelli, in carrying out investigative activities envisaged under Ministerial Decree 269/2010 and, in particular, defensive investigations pursuant to Article 327-bis of the Code of Criminal Procedure.

## Experience, Confidentiality, Reliability

---

Our team is composed of highly-specialised personnel with experience in prestigious State Police investigative offices (Criminalpol Lombardy, Mobile Team of Milan—Organised Crime and Capture Section, Anti-Mafia Investigation Department of Milan), able to respond in a confidential, transparent and effective manner to any request for information, investigations, monitoring and protection.

All BBS Security operators are in possession of the training certificates foreseen under legislation in force on "Safety and Security", with professional refresher courses being held annually with bodies accredited by the Lombardy Region training system and assigned to conduct the relative services on the basis of specific personal characteristics, professional ethics and authorities, confirming their capacity and reliability.

It is possible to work as a team, under the direction of our Coordinators and to profit from participating in security activities alongside the staff of any company.

## How We Operate

---

The in-depth study of each individual case, the risk analysis and the development of new preventive security policies or plans able to mitigate malicious or negligent occurrences (deriving from damage to material, intangible, organisational and human resources available to companies and private individuals) allows us to meticulously handle all investigative and security activities necessary to resolve the issue and propose new security strategies able to bring peace of mind to the client.

## Investigation Services for Individuals, Businesses and Professionals

---

All investigative activities are guaranteed by the presence—including immediate and throughout the national territory—of expert investigators, specialised in data analysis, tracking, stakeouts, electronic monitoring, interviews/interrogations and consisting of:

- the collection of evidence that can be used in court, including through documents filed with and consulted in public databases;
- control of the territory, through targeted operational activities (stakeouts and tracking), aimed at documenting the movements of persons subject to investigation, also via authorised technological tools (photo-video recording, GPS monitoring).

## Security Services

---

The introduction of the Ministerial Decree of 8<sup>th</sup> August 2007 (the so-called Stewarding Decree) and the Ministerial Decree of 6<sup>th</sup> October 2009 (termed the ex Bouncer decree) marked the start of the era of qualified security with a new professional role recognised throughout the national territory able to carry out their activities at the service of the public and in correlation with those holding entertainment and entertainment events.

The organisational capacity and experience of BBS Security's staff deriving from over thirty years with the State Police combined with direct and continuous training and updating activities means that all of our operators are able to perform their tasks with the utmost peace of mind and with ample safety margins, always in the interest of the community.

## Cyber Security

---

Cyber Security is an added value to the prevention and defence from cybercrime attacks, measures and countermeasures in the informatic field, as well as the verification of an infrastructure's level of security through *Penetration Testing*. Cyber Security also includes data recovery from any media.

## Stewarding Services

---

From a physical security perspective, sports events connected to the world of football represent a very significant undertaking in terms of the organisation and management of personnel. With Security Officers, Function Managers, Coordinators, Heads of Unit and Stewards in the quantity legally required, we form homogeneous working groups that are highly qualified and functional to the needs of each sports club that organises events within the professional categories (Serie A and B and Lega Pro).

This system can also be utilised for team sports where a considerable turnout is expected (sports facilities in general), including the organised Ultras groups (predominantly for basketball or ice hockey).

## Security at Public Performance and Events Venues Generally

---

Reception, assistance and management of critical situations are the primary tasks that each attaché must guarantee as part of their activities. Knowledge of the locations, the ability to interact with the public and a clarity of rapports with the Police Force and competent authorities within the territory in which control tasks are assigned, form the attributions that guarantee the success of any Security Service.

## Access Control and Concierge Management

---

Safety protocols along with actions coded in terms of time and experience allow our operators to secure otherwise accessible areas such as construction sites, warehouses, shops, large shopping malls, along with public and private companies by verifying the identity of persons accessing such affected areas, checking the post and monitoring goods.
